Introduction

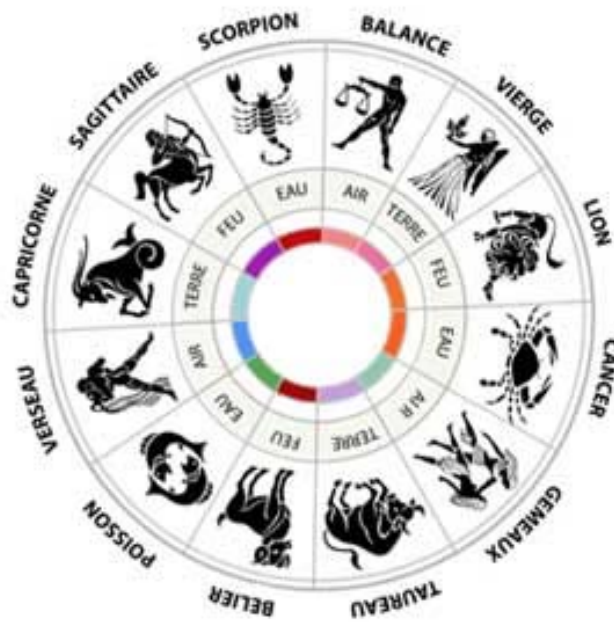

An astrologer or a horoscope analyst is no God to predict whatever is going to happen in your life as if he or she has programmed it. Yet, how is it that their predictions turn out to be true? There are exceptions of course, since some fake people often pose as astrologers and deliver horoscope analysis with wrong interpretations, and predictions that are unlikely to happen.

One more factor that leads the astrologers to make wrong predictions is the wrong birth details given to him or her. You have to understand that the astrologer is not going to fix some phenomenon in your life and let you know beforehand. What an astrologer does is to calculate the planetary positions, present the planetary pattern through your natal chart, make an analysis to interpret the influence of the planets, and find out what kinds of experiences you are most likely to go through during the different phases of your life. The more experienced, analytical, introspective and psychic an astrologer is, the more accurate he or she is in making predictions. Time calculation is one more important factor in the field of zodiac astrology.

Astrological Planets

An Overview

As per the Hindu myth and astrology, there are nine planets that affect our terrestrial phenomena. Their Sanskrit equivalent and the symbols used by Western Astrologers are also given here for your ready reference.

The nine important planets are:

1. Sun – Surya or Ravi.
2. Moon – Soma or Chandra.
3. Mars – Kuja or Angaraka.
4. Mercury – Budha or Soumya.
5. Jupiter – Guru or Brihashpati.
6. Venus – Shukra or Bhargava.
7. Saturn – Sani or Manda.
8. Dragon's head – Rahu or Thama.
9. Dragon's Tail – Ketu or Sikhi.

Signs Of The Zodiac

Vedic astrology or Hindu astrology has been derived from the Vedas – the prime Hindu text of philosophy. It is the study of the positions of different planets with respect to the zodiac and the effect of these planets on an individual. The zodiac is divided into 12 signs or Rashis. As per the Vedic astrology the twelve signs of the zodiac are:

Mesha

Aries

Vrishabha

Taurus

Mithuna
 Gemini
 Karaka
 Cancer

Simha
 Leo
 Kanya
 Virgo

Thula
 Libra
 Vrischika
 Scorpio

Dhanus
 Sagittarius
 Makara
 Capricorn

Kumbha
 Aquarius
 Meena
 Pisces

Signs & Their Element Groups

Each sign represents some element in nature such as fire, air, earth and water. The table below will help you know which astrological signs belong to which elements.

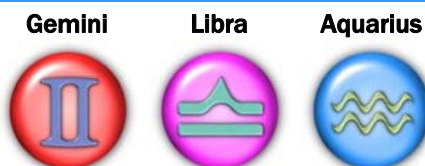

Fiery Signs

Earthy Signs

Airy Signs

Watery Signs

Fixed & Movable Signs In The Zodiac

The zodiac signs can be categorized on the basis of their flexibility features. One group of the zodiac signs is movable while the rest of the signs are fixed. Movable signs are Aries, Cancer, Libra and Capricorn. Taurus, Leo, Scorpio and Aquarius are fixed signs. Again Gemini, Virgo, Sagittarius and Pisces are said to be Mutable signs.

Odd signs And Even Signs

Aries, Gemini, Leo, Libra, Sagittarius and Aquarius are known as odd signs while Taurus, Cancer, Virgo, Scorpio, Capricorn and Pisces are even signs. It is generally said that all the odd signs are cruel and masculine signs, while the characteristics of the even signs are that they are mild and feminine.

Cancer, Leo, Virgo, Libra, Scorpio and Sagittarius generally symbolize long ascensions and those of short ascensions are Capricorn, Aquarius, Pisces, Aries, Taurus and Gemini. Cancer, Scorpio and Pisces are fruitful, whereas Gemini, Virgo and Leo are barren. Those signs which rise by their heads are Gemini, Leo, Virgo, Libra, Scorpio and Aquarius is all powerful during the day time. While the signs of Aries, Taurus, Cancer, Sagittarius and Capricorn are said to be powerful during the night.

Purpose Of Astrology Predictions

The purpose of an astrology analysis is to tell you not only if your sign is a water sign or a movable sign or an even sign but also know more about their effects on the characteristic attributes of your nature and personality. If you are interested to know your zodiac sign and your zodiac attributes, you can try MB Zodiac Astrology Software or MB Zodiac Signs Software. You can also try MB Zodiacal Suite to for a comprehensive and complete zodiac profile.

The moon sign as well as the sign that is ascending at the time of birth is also considered very important in Vedic astrology. This is the sign in the eastern horizon at the time of birth and is known as the Lagna or the Vedic Ascendant. This sign changes in every two hours and all 12 signs of the zodiac ascend in one period of 24 hours. Rashis or Vedic Moon Sign plays an important role in understanding an individual.

Conclusion

There is one thing that needs to be mentioned in this regard. The very concept of astrology has always some instances of denial and doubt attached to it. The scientific bases have turned many non-believers into interested believers in astrology. Yet it is not hard to find a person who thinks astrology as nothing but a professional trick for the shrewd to earn a livelihood.

My suggestion to them is to understand and believe a very simple thing that astrology or zodiac analysis is not an invention by the shrewd to exploit the simple, but a discovery by the brilliantly genius personalities who, even centuries ago, had the mind to study the stars, observe their course of movements and determine their positions graphically and mathematically, and thus, interpret the influence of the planets, stars and asteroids. Lifelong study, observations and calculations have enabled the astrology researchers to find out the attributes of the zodiac signs.
